Building a bridge to success

In today's globalised world, it is imperative for job-seekers to be equipped with the necessary qualifications – even with the ever-rising costs of higher education – to ensure that they do not lose out in the rat race.

By awarding scholarships and other forms of financial assistance to prodigous students, the UCSI University Trust and the University ensure that they are given an opportunity to achieve their professional dreams.

As exceptional learners with a Cumulative Grade Point Average (CGPA) above 3.90, three brothers – named David, Dan and Daniel Soo – tell their story of how their lives have taken a turn for the better.

"My family consists of my younger twin brothers (Dan and Daniel) and my mother, who is the sole breadwinner. While she receives a moderate monthly income, it would not have been sufficient for our university education," says David, a scholarship recipient of the UCSI University Trust.

"During our school breaks, we help out at our mom's office by delivering letters and assisting with other administrative tasks," he explains, adding that he is now able to help out at our mom's office by delivering letters and assisting with other administrative tasks.

"I lead a weekly Peer-assisted Study Session (PASS) to a group of five to twenty students per class to help them tackle their academic difficulties and better understand the course content for various subjects through effective learning and study strategies. I'm also the president of the UCSI Christian Fellowship," he says, explaining that such roles have lent him leadership skills.

"Like their brother, Dan and Daniel are equally active in the UCSI Christian Fellowship and the Student Council's Judicial Branch, among other clubs and associations."

By excelling in both the academic arena and in extra-curricular activities, it goes without saying that these siblings are on route to fulfil their dreams.

Chasing his dream

Tiew Kee Yee is another excellent student that the UCSI University Trust has taken under its wing. Despite being born with spinal muscular atrophy (type two) – a disease that causes his muscles to weaken – that confines him to a wheelchair, Kee Yee was awarded the Tan Sri Ahmad Razali Merit Scholarship for his academic excellence.

As part of the enrichment programme, all scholarship recipients volunteer their time for the University's various industry-linked projects, which enable them to get real-life work exposure.

Kee Yee – who is currently pursuing the University's Accounting degree programme – credits his lecturer, Dr Chong Aik Lee, whom he is assigned to for the enrichment programme for his passion in accounting, tax in particular.

Tiew said, "Dr Chong has been very generous in sharing tax-related knowledge and reading materials including reference books, government publications and articles with me."

Apart from being involved in the University's faculty projects, scholarship recipients like Tiew are strongly encouraged to join extra-curricular activities. Equally active in competitions such as the Deloitte Tax Challenge and the OSK Investment Challenge in 2011 and 2012, Tiew proves that his disability is no barrier to achieving his dreams.

Notably, these scholarships have made a profound difference in the lives of these talented individuals by providing them with a platform to further their studies and therefore, empowering them with fundamental knowledge on the intricacies of the industry.

And by helping deserving students like Kee Yee and the Soo siblings overcome the financial barricade, UCSI University Trust enables them to be the best that they can be.

To find out more about the scholarship programmes, come and meet the course counselors on the Open Days (Dec 22 – 23), call 03-9101 8880 or visit www.ucsiuniversity.edu.my/onlineenquiry or www.ucsiuniversity.edu.my.
