GCE A-Levels qualification ticket to universities worldwide

KUCHING: A common question asked by parents and students when deciding on which path to take after SPM is where a Cambridge GCE A-Level qualification will take a student.

It is a student’s international ticket to universities worldwide.

The Cambridge International A-Levels are accepted at grades A-E in lieu of UK GCE A-Levels.

This way students can stay on in the country to do GCE A Levels before proceeding onto Malaysian or overseas universities. Employers recognise good GCE A-Level grades as well when recruiting new employees.

This qualification is provided by the University of Cambridge International Examinations, a part of the University of Cambridge, one of the world’s top universities with its reputation for excellence in education.

Prospective students who are intent on taking up professional degrees such as Medicine, Pharmacy and Nursing are encouraged to take up the 18/15-month A-Level programme at the Centre for Pre-U Studies, UCSI University, which would also qualify them to pursue degrees in applied sciences and engineering.

Local students have the advantage of doing an international qualification close to home and in doing so have time to mature before heading off to university.

The enrolment for the programme at UCSI University is now in progress. The programme is offered at Kuala Lumpur and Sarawak campuses while the foundation programmes are offered at all campuses, including Terengganu.

For more information, call UCSI University, Sarawak Campus at 082-455 255 or log on to www.ucsi.edu.my/sarawak.
Ample opportunity: GCE A-Level students are all ears during a face-to-face session with a Centre for Pre-U Studies chemistry lecturer.
