

Welcome To The Club

As a new student in a brand new campus, undoubtedly you will worry about fitting in the new environment, how to make new friends etc. It's a different case for **UCSI students** though. Every semester after the student orientation, UCSI will hold their **two-day long Clubs Day** in both the North and South Wings of their **Kuala Lumpur campus**. Besides recruiting new members for the club, clubs and associations can also promote and showcase their past and **present achievements** to the campus folks. Students get to choose their entry to a wide range of clubs and associations according to their personal interest and hobbies. Besides being able to **discover their own talent** and niche as a team player, what's most important is that students get to experience a **holistic approach** towards education. The University place high concerns on the need for students to learn out of the rut and to gain experience at the same time. A collaboration effort between the **University's Centre for Learning Excellence and the Student Affairs Office, Extracurricular Learning Experience** is a soon to be implementing new course aiming to introduce students to experiential learning, exposing them to pertinent soft skills, articulate ideas, **developing strategic planning** and evaluation skills- all utmost important in life beyond the tertiary studies.
