Abstract

This paper will investigate the computing requirement for mobile nursing in Malaysia. The Mobile computing in nursing provides valuable insights into how nurses are using mobile computing solutions at the bedside and how these solutions can best be used to solve existing workflow inefficiencies. Mobile Nursing, which means nurses uses handheld computer in their workplace, show about what, why, and how the handheld computer helps nurses in their daily work. The advantages that physicians uses handheld computer for their daily work, for access reference information, improve coding and billing, and track patient data.
