UCSI's Year of Milestones

- Malaysia's best private university for two consecutive years.
- Ranked in the top 2% of all universities in the world.
- A top six university in Malaysia, along with the nation's five research universities.
- One of seven Malaysian universities in the top 500.
- Malaysia's best private university under 50 years old.
- One of the world's top 70 young universities.
- A top 100 university in the world for performing arts twice in a row.
- Malaysia's foremost music school and one of the best in the region.

QS World University Rankings 2020

QS World University Rankings 2019

- Malaysia's foremost music school and one of the best in the region.

QS World Top 70 Under 50 (2020)

- Malaysia's best private university under 50 years old.
- One of the world's top 70 young universities.

QS World University Rankings by Subject 2019

- A top 100 university in the world for performing arts twice in a row.
- Malaysia's foremost music school and one of the best in the region.

UCSI is rated in Tier 5 (Emerging Universities) in SETARA 2017, placing it on a par with established foreign branch campuses in Malaysia.

UCSI students obtain a merit-based government scholarship or grant. 1 IN 5

have studied at UCSI.
UCSI University opens door for students everywhere. It collaborates with the world’s leading universities, engages the best minds and partners with global companies.

For the second consecutive year, UCSI University is Malaysia’s best private university in the QS World University Rankings 2020. UCSI rose 39 spots from its previous rankings to be ranked 442 in the world. It is a top seven university in Malaysia and the only private and non-government linked institution in the country to be inducted in the Top 500 amongst the world’s universities for the two years straight. This renewed recognition placed the University in the top 2% of all universities worldwide, making it one of the most prestigious universities in the country.

UCSI’s Institute of Music (IMus) is also distinguished as a global top 100 music school for performing arts twice in a row in the QS World University Rankings by Subject 2018 and 2019. UCSI was previously distinguished as Asia’s fastest rising university in the QS University Rankings: Asia 2018 after making the meteoric 131-spot climb. Other than that, UCSI is rated in Tier 5 (Emerging Universities) – the highest rating achieved by universities under 15 years old – in SETARA 2017, on par with established foreign branch campuses in Malaysia.

Long renowned for its excellent track record in teaching and learning, UCSI is quickly making a name for itself in research and innovation. The number of research publications has increased by 155% from 2013. There was over 900% increase in UCSI’s citation numbers from 2014 to 2017. The research funding had also increased by three times just between 2016 and 2017. It is no wonder that many of UCSI academic staff are PhD holders.

This distinction opens doors for UCSI students and staff when it comes to collaboration with the world’s best companies, research institutes and universities. Since 2014, UCSI’s top students have been annually selected to advance high impact research at Harvard University, Imperial College London, the University of Chicago and Tsinghua University amongst others. A batch of Pharmacy students also furthered research at the University of British Columbia. More endeavours are in the pipeline with leading universities in the Ivy League, the Russel Group, Universitas 21 and Australia’s Group of Eight.

More than 10,000 students from over 110 nations study at UCSI, making the campus a vibrant melting pot of culture and diversity. The University runs what is virtually Malaysia’s largest university-industry network through its Employment and Co-Operative Placement (Co-Op) programme, which provides employment support services for UCSI’s undergraduate and graduates, including alumni. Today, it has over 4,200 global companies to provide each student with at least two months of internships each year. This network includes many of the world’s best firms like Accenture, CIMB, Citibank, Deloitte, DHL, Ernst & Young, Hewlett-Packard, HSBC, KPMG, Maybank, Nestle, Samsung, Schlumberger, Standard Chartered, Ogilvy, P&G, Petronas and PWC, amongst many others. Above that, 97.8% of them state that they would rehire UCSI’s interns.

With these and more, UCSI stands out as a University that offers an education few can, provides experiences others can’t and delivers life-defining outcomes for students everywhere.
At present, the operational capacity at UCSI’s Kuala Lumpur campus stands at more than one million ft(2), creating a state-of-the-art learning space. Popular with students and parents, its designs embody the zeitgeist of the 21st century dynamism and interconnectivity. Housing science labs, interactive learning spaces, lecture theatres, recital halls, commercial areas, classrooms, hostels, sports facilities and a multi-level parking facility, the present complex will change the way how students perceive and experience education.

Job done? Not a chance. UCSI’s recent campus expansion is merely a microcosm of a far grander plan. More development will be undertaken to transform the Kuala Lumpur campus into a prominent education city that defines the Cheras skyline. UCSI Hospital is also on the verge of completion. Offering the American model of clinical practice patientcare, this private teaching hospital is purposed to turn Springhill into a vibrant hub of healthcare, education and medical tourism. Over in Kuching, UCSI’s eponymous hotel doubles up as its Sarawak campus, providing students with the latest facilities and learning spaces.

Join the education revolution today.
Established in 1992, the Faculty of Engineering, Technology and Built Environment is one of the strongest faculties at UCSI University. A confluence of practical studies and theoretical learning, the Faculty has developed a range of innovative programmes that are recognised by both local and international bodies like the Malaysian Qualifications Agency (MQA), the Malaysian Engineering Accreditation Council (EAC), and the Board of Engineers Malaysia (BEM). With Malaysia as a signatory of the Washington Accord, our programmes are also recommended for recognition by member countries including Australia, Canada, Ireland, New Zealand, UK and US.

Adding to its renown is its expertise – which is extensive. Students learn from esteemed academics – a rich mix of industry practitioners, professors and informed researchers – who have established lasting bonds with the industry and leading-edge universities across the globe. The academics build on two vital qualities: An eagerness to share their knowledge and a desire to engage students in the Faculty’s research projects. Supported by its very own custom-built campus where students will have access to industry-standard facilities and engineering software and technology, the Faculty continues to assert its role as a place of creativity and exceptional learning and teaching.

This has led to tie-ups with partner universities across the globe, enabling the Faculty to make headway in high impact research collaborations. Our top students are sent abroad annually for research attachments at some of the best universities in the world such as Imperial College London in the UK and Tsinghua University in China.

Each of these features is woven into the Faculty’s long-standing tradition of excellence, where its sterling reputation is matched only by the many achievements of its teaching staff, students and graduates. Your studies here will be insightful. But more than that, it will be meaningful. Theory will lead to cutting-edge practice. Your enthusiasm will lead you to achievements. And your work will be challenging and impactful.

Engineer your future with us today.
Foundation in Science with Engineering pathway

The demand for engineers is a constant one. From time immemorial, engineers have contributed pivotal technologies that have transformed the spheres of manufacturing, communications, healthcare, energy, business and IT. And as we stand at the onset of the Fourth Industrial Revolution, engineers will play a starring role in the era of smart factories, the industrial internet of things, next-generation robotics and self-learning AI.

If you want to play a role in engineering the future, you’ll need to acquire a fundamental understanding in science, technology, engineering and mathematics (STEM). We provide that at UCSI through our foundation pathway in engineering. And with a special focus on engineering design and advanced engineering technology, we provide a pre-university environment that allows you to pursue your affinities and delve deep into your preferred field of study from day one.

At UCSI, you will learn from esteemed professors and academics who work on solutions that address global problems. Their guidance will expand your horizons and you will see first-hand how the best engineering solutions are derived not only through technical excellence, but through creativity, innovation, cultural awareness and entrepreneurial know-how. You will also take part in industry visits and you will enjoy avenues to apply your knowledge at state-of-the-art laboratories and facilities.

This dynamic environment is what you can look forward to during your pre-university years. And as you lay the groundwork for further studies in Engineering, you will appreciate how this is more than a prep course. It’s a springboard to a consequential career. Join us and engineer the future.

TEO XSU LI

Started with the Foundation in Science.
Alumna, BEng (Hons) Chemical Engineering.

Selected to advance high impact research at Tsinghua University in 2016.

---

GET THE IDEAL START WITH UCSI’S SPECIALISED FOUNDATION PATHWAYS

| Tailor-made courses that cater to specialised career pathways. |
| Be taught by notable professors from day one. |
| Enjoy a well-resourced and supportive learning environment. |
| Enjoy strong exposure to industry trends and developments. |
| Benefit from lessons that stimulate and encourage critical thinking. |
| Utilise exceptional subject-specific facilities. |

Entry Requirements

Academic Qualification

SPM: Minimum 5 credits, including one Mathematics and one pure Science subject

English Requirement

No English requirement is necessary for entry into the Foundation programmes for both local and international students.

---

FACULTY OF ENGINEERING, TECHNOLOGY AND BUILT ENVIRONMENT
Start Focused. Stay Ahead.

UCSI’s specialised foundation pathway helps you acquire a much stronger grasp of your chosen field of study while covering the overall reach of a standard foundation programme. Apart from helping you immensely as you progress to degree studies, UCSI’s foundation programme also provides you with an early taste of what the industry expects.

Core Subjects

- General Chemistry I
- General Chemistry II
- General Physics I
- General Physics II / General Biology I
- Accounting Practice
- Fundamentals of Mathematics
- Algebra and Trigonometry
- Calculus
- Introduction to Probability and Statistics
- Introduction to Business
- Computing Essentials

Special Focus On

- Introduction to Engineers in Society
- Introduction to Advanced Engineering Technology
- Elementary Engineering Design

Bachelor Degrees

- Bachelor of Engineering (Hons) Chemical Engineering
- Bachelor of Engineering (Hons) Petroleum Engineering
- Bachelor of Engineering (Hons) Mechanical Engineering
- Bachelor of Engineering (Hons) in Mechatronic Engineering
- Bachelor of Engineering (Hons) Civil Engineering
- Bachelor of Engineering (Hons) Communication and Electronic Engineering
- Bachelor of Engineering (Hons) Electrical and Electronic Engineering
- Other related degree programmes

Guidance From The Best

Learn from a team of acclaimed professors and academics who are at the forefront of their respective disciplines. Work with them, be mentored by them and benefit from their wealth of experience.

Associate Professor Ir Dr Jimmy Mok Vee Hoong
Deputy Vice-Chancellor, Academic, Student and Alumni Affairs
BEng (Hons) Electrical and Electronic Engineering (UMIST, UK), PhD in Microwave Engineering (UMIST, UK)

Professor Dato’ Dr Ahmad Bin Ibrahim
Professor of Environmental Management
BChem Eng (Monash)
PhD Water and Waste Engineering (Newcastle)
Fellow Academy of Sciences Malaysia

Professor Ir Dr Barkawi Bin Sahari
Professor of Mechanical Engineering
BSc (Hons) Mechanical Engineering (University of Nottingham, UK)
PhD in Mechanical Engineering (University of Nottingham, UK)

Assistant Professor Ir Dr Deprizon Syamsunur
Assistant Professor, Civil Engineering
PhD Highway and Transportation Engineering (UKM)
MSc Highway and Transportation Engineering (UKM)
ST Highway and Transportation Engineering (Universitas Islam, Indonesia)

Assistant Professor Dr Ang Chun Kit
Dean, Faculty of Engineering, Technology and Built Environment
BEng (Hons) Mechatronic Engineering (UCSI University), PhD in Mechanical Engineering (UPM)

Assistant Professor Dr Lim Wei Hong
Head of Department, Mechanical Engineering
PhD Electrical and Electronics Engineering
BEng (Hons) Mechatronic Engineering

Ir Associate Professor Dr Rodney Tan Hean Gay
Associate Professor
BSc E&E Engineering (Aberdeen’s Robert Gordon University, UK), MSc Microelectronic Engineering (Liverpool John Moores University, UK), PhD Electrical Engineering (UNITEN)

Assistant Professor Dr Kiew Peck Loo
Lecturer
BChem Engineering (USM), PhD Chemical Engineering (USM)
Bachelor of Chemical Engineering with Honours

This four-year programme combines the three basic physical sciences – chemistry, physics and biology – with mathematics, which makes it one of today’s most versatile engineering fields. This allows room for specialisation in a very broad spectrum of fields – from nanotechnology and oil refining to conversion of biomass or waste valuable products. At UCSI, students are exposed to a myriad of new technologies that are rapidly reshaping the society we live in.

**DID YOU KNOW?**

The Faculty is known to regularly win awards at competitions organised at the home front and internationally. Since 2014, UCSI’s chemical engineering students have bagged more than 20 awards.

Bachelor of Petroleum Engineering with Honours

(R2/524/6/0205) (05/2023) (MQA/FA9301)

Under a well-balanced curriculum that aims to provide both breadth and depth across petroleum engineering specialisations, students will build a solid foundation in oil and gas exploration, production and development as they master core topics in petroleum geology, petroleum economy and well completion.

At the Faculty, students will have access to well-equipped laboratories and sophisticated computers equipped with licensed engineering software such as NEXUS, COMPASS, t-navigator and other commercial reservoir simulation software. Industrial-based projects will also open the way for insights from industry experts. By the end of this four-year programme, they will have learned to address pressing issues and design innovative solutions that benefit society and organisations.

Bachelor of **Mechanical Engineering** with Honours

(02/521/6/0015) (05/2025) (MQA/FA9304)

This programme offers a comprehensive range of core engineering science courses and practical projects to ensure it is highly integrated and industry-relevant. As they progress, students will be well-equipped to not only design mechanical components and systems but also solve engineering problems by applying different techniques and strong analytical skills. They will be exposed to the latest advances in engineering technologies and with the emphasis on experimental work, students will gain the skills needed to take on the challenge of designing products and process that are faster, more versatile and environmentally friendly.

Bachelor of Mechatronics Engineering with Honours

Integrating three major engineering disciplines, this programme places its main emphasis on the domains of mechanical engineering, electrical and electronic engineering and software engineering. Students will constantly analyse and design complex systems to meet challenges posed by emerging technologies. They will also learn a combination of mechanical, electronic and computer science techniques that will help them design, fabricate, assemble and maintain automation and modern manufacturing systems.

Expect to develop a solid understanding of the social, cultural, global and environmental responsibilities of the professional engineer while gaining high-level technical skills essential in managing modern engineering tasks.

DID YOU KNOW?

Two Mechatronic Engineering students, Ngo Kah Lock (left) and Chong Ying Hai (right), were selected for a four month research exchange programme in National Taipei University of Technology under the supervision of Professor Dr Leechter Yao (middle).

Some notable projects completed by Mechatronic Engineering students: (a) low cost DIY 3D printer, (b) drone with flying and walking capabilities and (c) smart vacuum cleaner robot.

Bachelor of Civil Engineering with Honours

The buildings we frequent, the bridges we cross, the roads we drive on; every structure, surface and support system is grounded in civil engineering. In this programme, students will learn how to design, construct and maintain structures in the ‘built environment’. Students will read a wide range of courses that includes structural analysis, geomatics, and hydraulics, highway and traffic, as well as water and sewerage systems – all of which emphasise engineering and managerial skills at the same time. This will ensure they have the ability to apply what they learn to real-life projects where financial and ethical issues are taken into account. By the end of the programme, students will be well prepared to devise high impact solutions and change lives for the better.

UCSI is home to the Institute of Electrical and Electronics Engineers-Eta Kappa Nu (IEEE-HKN) Student Chapter - the top 10% of HKN Chapters competing with top universities around the world. Through this Student Chapter, our students enjoy exciting events and opportunities to interact with top students at renowned universities across the globe such as Massachusetts Institute of Technology, Purdue University and the University of California, Berkeley. This Student Chapter has received the Outstanding Student Chapter Award for the fourth consecutive term (2014-2015, 2015-2016, 2016-2017 and 2017-2018).

**Ir. Associate Professor Dr Rodney Tan Hean Gay** is the recipient of the **Mathworks Central Challenge Coin Award**, presented in recognition of his contributions to MATLAB – a system used by engineers and scientists worldwide.

**International Degree Pathway***

**University of Manitoba (up to 2+2)**
BSc Electrical Engineering

**University of Queensland (2+2.5)**
Bachelor of Engineering (Hons) Electrical Engineering

**Career Opportunities:**

Design Engineer | Project Engineer | R&D Engineer | System Design Engineer | Analog Design Engineer | Test Engineer | PCB Design Engineer | Electrical Engineer | Digital Design Engineer | Quality Control Engineer/Specialist | Research Engineer | Software Engineer | Sales Engineer | Product Engineer

---

**SUBJECT LISTING**

**YEAR 1**
- Calculus & Analytical Geometry II
- Circuit Theory I
- Digital Electronics I
- Analogue Electronic I
- Mathematical Methods for Engineers I
- Technical Communication
- Electromagnetic Theory I
- Electronic Laboratory 1A
- Electronic Laboratory 1B

**YEAR 2**
- Advanced Circuit Theory &TL Engineering Design
- Mathematical Methods for Engineers II
- Electronic Manufacturing Industry
- Engineering Softwares & Applications
- Electrical Power
- Computing for Engineers
- Co-operative Placement 2
- Analogue Electronics II
- Digital Electronics II
- Electronic Laboratory 2A
- Electronic Laboratory 2B

**YEAR 3**
- Communication Theory
- Numerical Analysis
- Instrumentation & Measurement
- Data Communication & Networks
- Microprocessor Systems
- Electrical Machines
- Environmental Engineering
- Control Systems
- Engineering & Management & Economics
- Engineers in Society
- Embedded Systems Design
- Electronic Laboratory 3A
- Electrical Laboratory 3B
- Electrical Laboratory 3C

**YEAR 4**
- Digital Signal processing
- Digital Systems & HDLs
- Energy Conversion & High Voltage Power Transmission
- Power Electronics
- Design Project
- Final Year Project A
- Power Systems
- Final Year Project B
- Co-operative Placement 4
- Power System Protection
- Electronic Laboratory 4A
- Electrical Laboratory 4B

**Elective:**
- Electromagnetic Theory II
- Introduction to Production and manufacturing
- VLSI Design
- Technopreneurship

---

*General Courses (MPU) are compulsory for all students. Please refer to page 15.

---

**DID YOU KNOW?**

International Degree Pathway*

**University of Manitoba (up to 2+2)**
BSc Electrical Engineering

**University of Queensland (2+2.5)**
Bachelor of Engineering (Hons) Electrical Engineering

**Career Opportunities:**

Design Engineer | Project Engineer | R&D Engineer | System Design Engineer | Analog Design Engineer | Test Engineer | PCB Design Engineer | Electrical Engineer | Digital Design Engineer | Quality Control Engineer/Specialist | Research Engineer | Software Engineer | Sales Engineer | Product Engineer

---

*Terms and conditions apply
Diploma In
Electrical and Electronic Engineering

Students of this programme will receive a strong engineering foundation in electrical technology, telecommunication, control and instrumentation systems, as well as digital and analogue electronics. Expect plenty of hands-on training in cutting-edge laboratories as you hone your technical skills and tackle complex projects.

Career Opportunities:
Design Engineer | Project Engineer | R&D Engineer | System Design Engineer |
Analog Design Engineer | Test Engineer | PCB Design Engineer |
Electrical Engineer | Digital Design Engineer

Some notable projects completed by students from the Diploma in Electrical and Electronic Engineering programme

- Hydroponic Gardening using PVC Pipe
- The Pesticide/Crop Garden Sprayer (PGS)
FACILITIES

The state-of-the-art facilities and laboratories that our students work and study in have played a significant role in preparing them for the real world. Here are some of them.

GEOMATIC AND CONCRETE LAB

This lab is equipped with all the necessary surveying equipment. Students use this equipment for land surveying, and to analyse data collected during assignments. Students can also perform engineering evaluations and experiments to test the qualities of building materials like concrete and other cementitious materials here.

ELECTRICAL AND ELECTRONIC LAB

Equipped with the state-of-the-art of fundamental Electrical and Electronic measurements, this lab allows students to run experiments related to Circuit Analysis, Digital and Analogue Electronics using multimeter, power supply, oscilloscope and function generators.

MATERIAL SCIENCE AND PETROLOGY SOIL MECHANICS LAB

In this lab, students can develop further knowledge of materials structure, properties, performance and its processes by producing, transforming, and analysing materials. Students can also conduct experiments to process, test and determine soil properties here.

THERMO-FLUID LAB

The lab allows students to conduct research in thermodynamics, fluid mechanics, and heat transfer. Students can also study a variety of complex engineering issues, such as electronics cooling, nanofluidics, micro-flow control, and bio-inspired fluid dynamics.
POWER, MACHINE AND DRIVE LAB

In this lab, students study the courses related to power, machines and drives. This lab allows students to conduct experiments related to power system protection, power electronics, power transmission and distribution with AC machines, DC machines and an electrical transformer.

INSTRUMENTATION LAB

This laboratory has state-of-the-art equipment for teaching and research development. It includes an atomic absorption spectroscopy (AAS), Fourier Transform Infrared Spectroscopy (FTIR), UV-VIS spectroscopy with desktop computer, nano zeta sizer, titrator and tensiometer.

PETROCHEMICAL LAB

This lab has the necessary equipment for the analysis and characterisation of solid, liquid and gaseous substances which students can use to conduct testing and research in the areas of air and water pollution. The equipment available includes a viscometer bath, flashpoint tester, seta oil test centrifuge, rotary evaporator, colorimeter, jar test, and turbidity meter.

ADVANCED CHEMICAL LABORATORY

This laboratory has all the equipment for aspiring chemical engineers to conduct physical and chemical processes (fluid flow, heat and mass transfer). Equipment includes a PC-controlled and data logging system, a gas chromatography with a desktop computer, gas absorption demonstration unit, tubular flow reactor with a desktop computer, refractometer, continuous distillation column, batch reactor and CSTR in series.
### GENERAL COURSES (MPU)

**COMPULSORY FOR ALL STUDENTS**

**ALL STUDENTS**

- U2 – University Life
- U2 – Technical Communication
- U3 – Malaysian Experiential Tourism/Malaysian Ethnic Food
- U4 – Extra-curricular Learning Experience 1 to 3

**ALL STUDENTS**

- U2 – Study Skills and Employability
- U3 – Malaysian Eco-Tourism/Malaysian Traditional Food
- U4 – Extra-curricular Learning Experience 1 to 2

---

**KHAW LIANG FA**
Bachelor of Engineering (Hons) Chemical Engineering

*Imperial College London*

Selected by Imperial College London in 2018 to do research on the enhancement of the performance of silica nanoparticles in protein crystallisation by changing the particle morphology and surface chemistry.

---

**GARY POH KWOR XIANG**
Bachelor of Engineering (Hons) Chemical Engineering

*Imperial College London*

Drove cutting-edge research in protein crystallisation using DNA origami. His research aims to form protein crystals which have wide applications in pharmaceutical, biotechnology and biomedical industries.

---

**THI SHIKI**
Bachelor of Engineering (Hons) Chemical Engineering

*Tsinghua University*

Advanced research in DNA nanotechnology with the aim of innovating protein crystallisation, a process which produces the crystals needed to study the molecular structure of protein for various pharmaceutical and biotechnological applications.
ENTRY REQUIREMENTS
INTAKES: JANUARY, MAY AND SEPTEMBER

DIRECT ENTRY INTO BACHELOR'S DEGREE (ALL ENGINEERING MAJORS EXCEPT CHEMICAL ENGINEERING)

<table>
<thead>
<tr>
<th>QUALIFICATIONS</th>

</table>

Upon successful completion of the diploma programme, students will gain up to 30% of credit transfer of the total credits, depending on the chosen degree programme.

Note: Discretion is given to Dean/Deputy Dean to deal with other borderline Academic Requirements.

ENGLISH REQUIREMENTS

DIPLOMA

• A distinction (A+, A or A-) in the English Language subject at SPM/UEC level; or MUET Band 2; or a score of 196 (computer-based) / 525 (writing-based) / 69-70 (internet-based) in TOEFL; or Band 5 in IELTS.

• In the event that the English Language Requirements are not met, student may be required to undertake additional English module(s) prior to or concurrently with the undergraduate programme, based on the University’s decision.

DEGREE

• A distinction (A+, A or A-) in the English Language subject at SPM/UEC level; or MUET Band 3; or a score of 196 (computer-based) / 525 (writing-based) / 69-70 (internet-based) in TOEFL; or Band 5 in IELTS.

• In the event that the English Language Requirements are not met, student may be required to undertake additional English module(s) prior to or concurrently with the undergraduate programme, based on the University’s decision.

International students holding equivalent academic qualifications but which are not conducted in English, are required to sit for the English Placement Test, which may result in the taking of the English Enrichment Programme (1 to 10 months). Students who intend to pursue the above undergraduate programme directly, are advised to fulfil the above English requirements prior to commencing their studies at the University.

While the above information is accurate at the time of printing, please note that entry requirements are subject to change. Please visit the university website for the most updated information.
