

# STUDENTS' FEEDBACK AND COMMENTS ON FULL ONLINE LESSONS

The class time is more flexible and we can also playback the lecture at any time.

We can understand very well from online teaching.

The online teaching method given by the lecturer is good and we can clearly understand the syllabus just like the usual face-to-face class.

We can understand the topics better and clearer through online teaching.

Thank you for providing a very effective e-learning session. We are able to study well and managed to jot down all the important points.

Easy to understand and a very effective teaching method.

A very convenient way to study because of the flexibility of the online class. We can also jot down notes and are able to pause the video to search for information. The only drawback is that we could not carry out group activity to stimulate our interest in the subject. Other than that is good. Thank you.

Overall, online learning is quite good. We can even refer again if we missed out any part.

Online learning was good as it is easy to access the slides when needed.

It was good, flexible and easy to mark down the information apart from being able to refer to the online video again when needed.

Overall, online learning is quite good. Just a suggestion, maybe can include a small assessment within or after the lecture to enhance our understanding of the topic.

Online learning provides us with a flexible learning environment to learn from any location that has a good internet connection.

In an online class, we are able to ask questions directly to the lecturer apart from disciplining ourselves to attend the online class.

Pre-recorded lectures are very helpful as we can review the lectures at any time to deepen our understanding.

Online learning via ZOOM has been really fun and interactive. The connection was surprisingly good and we are comfortable participating.

Online learning is fun and convenient because of the flexible time where we can work at our own convenient time unlike traditional classroom setting.

## Students of Faculty of Applied Sciences

“The lecturers did a great job in adapting to the changes and we really appreciate it. We enjoy these online classes as we can listen to the explanations over and over again. The lecturers are also keen to help us when we reach out via email.”

**Student of BA (Hons) Logistics Management**

“Submission of assignments, group chats, and quizzes are more convenient and it is a good practice. We think it's better to mix online learning and face-to-face learning after the MCO period ends. We have gotten pretty used to online learning even though we have started using it recently. Stay safe, everyone.”

**Student of Bachelor of Petroleum Engineering with Honours**

“Some applications allow recording during a virtual meeting which means after class, we have the flexibility to refer and recap whatever has been taught by the lecturer.”

**Student of Diploma in Culinary Arts**

“Online teaching is very good as our lecturer can correct our mistakes at the same time.”

**Student of English for Tertiary Education**

“Online learning helps us to schedule our free time effectively for assignments without having to walk through different weathers. In fact, we get to learn from our comfortable homes and clothes apart from having more time to rest.”

**Student of Bachelor of Classical Music (Hons)**

“Online classes run very well and we enjoy the experience. The video lessons are informative and nicely sectioned. If we missed anything, we can just rewind and listen again. The lecturers were also responsive to our emails or messages. Furthermore, we could spend more time in between classes working on personal matters and spending time with our family.”

**Student of BSc (Hons) Aquatic Science**

“With the help of online learning, our feedbacks are faster and the lecturer can have extra time to give us more questions that requires critical thinking skill. At the same time, this encourages us to apply the skill to think out of the box.”

**Student of Bachelor of Arts (Hons) in English Language & Communication**

“The timing is more flexible. It is more convenient at home. During Q and A sessions, we have more courage to ask questions via E-Learning. We have more free time without having to wait for the next class.”

**Student(s) of Bachelor of Pharmacy (Hons)**

“It is more comfortable as we are at our homes.”

**Student of Bachelor of Optometry (Hons)**

“It's easier to track our progress online compared to physical class. We are able to consult our lecturers without having to wait for a few working days. With online medium, consultations get easier and faster.”

**Student of BCA (Hons) 3D Animation Design**

“Personally, online is another effective way of learning. We can record our full programme and discuss in detail with our lecturer for our piano playing. However, although the points can be absorbed theoretically, there are also some practical issues that could not be done via online learning.”

**Student of Bachelor of Classical Music (Hons)**
